

Dhurv Kumar Gupta

Aspiring AI/ML Engineer

+91-9456010415 | dhruvgupta05@gmail.com | linkedin.com | github.com

SUMMARY

AI/ML Engineer and Full-Stack Developer skilled in React, FastAPI, Python, NLP, RAG, and Computer Vision. Built AI-powered applications using modern web and AI technologies.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL

AI/ML: Scikit-learn, TensorFlow, PyTorch, NLP, RAG, Computer Vision, LangChain

Backend: FastAPI, REST APIs

Frontend: React.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, Streamlit

EDUCATION

Uttarakhand Technical University, Dehradun

2023 – 2027

B.Tech in Computer Science and Engineering (AI & ML)

EXPERIENCE

Web Developer Intern | CodSoft

2025 – 2026

[Project-Link](#)

- Developed a job portal serving 100+ test users with role-based authentication.
- Designed REST APIs handling authentication, job posting, and application workflows.
- Applied clean coding practices and improved application performance.

PROJECTS

AI-Research Assistant

[Live-Link](#) [GitHub-Link](#)

- Built an AI Research Assistant using React, FastAPI, and MongoDB with LLM and RAG concepts to help users upload research papers and interact with them intelligently.
- Developed an AI automation workflow using arXiv APIs to automatically discover research papers based on user interests and generate AI-powered summaries.
- Implemented a RAG pipeline with PDF text extraction, chunking, embeddings, and ChromaDB vector storage to support contextual question-answering from uploaded documents.

Health Prediction App

[Live-Link](#) [GitHub-Link](#)

- Built a full-stack AI-powered health risk prediction system using React, Node.js, Flask, and MongoDB, enabling real-time medical risk analysis.
- Built a full-stack AI-powered health risk prediction system using React, Node.js, Flask, and MongoDB, enabling real-time medical risk analysis.
- Integrated a trained ML model to perform real-time predictions based on user health parameters.

Driver Drowsiness Detection System (OpenCV + MediaPipe)

[Demo-Link](#) [GitHub-Link](#)

- Built a real-time driver drowsiness detection system using OpenCV and MediaPipe.
- Implemented EAR & MAR-based fatigue detection with temporal filtering to reduce false alerts
- Integrated a real-time alert system to trigger warnings during drowsiness conditions.

ACHIEVEMENTS

- Solved 150+ Data Structures and Algorithms problems across LeetCode platform.
- Built and deployed 5+ AI-powered applications using RAG, LLM, React, FastAPI, and MongoDB.
- Implemented Retrieval-Augmented Generation (RAG) systems using LangChain and ChromaDB.
