

Dhuruv Kumar Gupta

Full Stack Developer | AI/ML Enthusiast

+91-9456010415 | dhruvgupta05@gmail.com | linkedin.com | github.com

SUMMARY

Full Stack Developer with experience building scalable web applications using React.js, Node.js, FastAPI, MongoDB, and MySQL. Strong foundation in Data Structures, REST APIs, and modern software development practices. Experienced in integrating AI/ML capabilities into full-stack applications using NLP, RAG, and Computer Vision technologies.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL

Frontend: React.js, HTML5, CSS3

Backend: FastAPI, Node.js, Flask, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Streamlit

Concepts: OOP, Data Structures, Algorithms, REST Architecture, SDLC, Agile

AI/ML: Scikit-learn, TensorFlow, PyTorch, NLP, RAG, LangChain, Computer Vision

EDUCATION

Uttarakhand Technical University, Dehradun

2023 – 2027

B.Tech in Computer Science and Engineering (AI & ML)

EXPERIENCE

Web Developer Intern | CodSoft

2025 – 2026

[Project-Link](#)

- Developed a job portal serving 100+ test users with role-based authentication.
- Designed REST APIs handling authentication, job posting, and application workflows.
- Applied clean coding practices and improved application performance.

PROJECTS

AI-Research Assistant

[Live-Link](#) [GitHub-Link](#)

- Built a full-stack AI research platform using React, FastAPI, MongoDB, and Retrieval-Augmented Generation (RAG).
- Developed an AI automation workflow using arXiv APIs to automatically discover research papers based on user interests and generate AI-powered summaries.
- Implemented a RAG pipeline with PDF text extraction, chunking, embeddings, and ChromaDB vector storage to support contextual question-answering from uploaded documents.

Health Prediction App

[Live-Link](#) [GitHub-Link](#)

- Built a full-stack AI-powered health risk prediction system using React, Node.js, Flask, and MongoDB.
- Developed responsive user interfaces and integrated backend APIs for seamless user interaction.
- Integrated a trained ML model to perform real-time predictions based on user health parameters.

Driver Drowsiness Detection System (OpenCV + MediaPipe)

[Demo-Link](#) [GitHub-Link](#)

- Built a real-time driver drowsiness detection system using OpenCV and MediaPipe.
- Implemented EAR & MAR-based fatigue detection with temporal filtering to reduce false alerts
- Integrated a real-time alert system to trigger warnings during drowsiness conditions.

ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms problems across LeetCode platform.
- Built and deployed 5+ full-stack and AI-powered applications using React, FastAPI, Node.js, MongoDB, RAG, and LLM technologies.
- Implemented Retrieval-Augmented Generation (RAG) systems using LangChain and ChromaDB.
